

As a Wisconsin resident, I feel that the Do Not Call protections afforded by our state law actually work! I do not want them weakened. Consumers are bombarded by advertising wherever they go. They are certainly aware of the options available to them should they desire to buy a service or product. I don't know why vendors don't get it -- when they bother me at home, with solicitations that invade my privacy, they go straight to the BOTTOM of my list when I consider my next purchase. Please do not weaken the Wisconsin law.
